Esculturas de Ingelore Kreienborg

Na exposição, apresentamos várias esculturas que podem ser feitas tanto em modelos menores (manequins, figuras de sala) quanto em tamanhos monumentais de 3 a 4 metros — ideais para parques, jardins ou áreas externas de prestígio.

As esculturas são feitas de alumínio resistente à corrosão, pintadas com tinta acrílica de alta qualidade resistente às intempéries e adicionalmente seladas. Isto significa que as obras estão permanentemente protegidas contra os efeitos do tempo e mantêm o seu apelo artístico por muitos anos.

Cada escultura pode ser personalizada em consulta com a artista. A pedido, Ingelore Kreienborg também desenvolve as suas obras diretamente no local, integrando as ideias e conceitos do cliente e criando assim destaques artísticos únicos.

Este design personalizado torna cada figura única.

Aguardamos o seu contacto.

Escultura em alumínio resistente à corrosão montada numa base.

A superfície é concebida com tintas acrílicas de alta qualidade, resistentes às intempéries, e adicionalmente selada para que tanto o metal como a tinta sejam permanentemente resistentes às intempéries.

Além disso, é utilizado vidro acrílico, que também é resistente às intempéries, pode ser cortado em qualquer tamanho e espessura e oferece uma ampla gama de opções de design.

Os preços incluem impostos.

Sculptures by Ingelore Kreienborg

In the exhibition, we present various sculptures that can be made both as smaller models (mannequins, room figures) and in monumental sizes of 3 to 4 metres - ideal for parks, gardens or prestigious outdoor areas.

The sculptures are made of corrosion-resistant aluminium, painted with high-quality, weather-resistant acrylic paint and additionally sealed. This means that the works are permanently protected against the effects of the weather and retain their artistic appeal for many years.

Each sculpture can be customised in consultation with the artist. On request, Ingelore Kreienborg also develops its works directly on site, integrating the client's ideas and conceptions and thus creating unique artistic highlights.

This personalised design makes each figure unique.

We look forward to receiving your enquiry.

Corrosion-resistant aluminium sculpture mounted on a base.

The surface is designed with high-quality, weather-resistant acrylic paints and additionally sealed so that both the metal and the paint are permanently weather-resistant.

In addition, acrylic glass is used, which is also weather-resistant, can be cut to any size and thickness and offers a wide range of design options.
